

COVID-19: Health and Safety risk assessment for full school reopening, September 2020

Assessment conducted by:	Tom Beveridge	Job title:	Headteacher	Covered by this assessment	Staff, pupils, contractors, visitors, volunteers
Date of assessment:	03/09/2020	Review interval:	Release of updated guidance	Date of next review:	11/09/2020

The Government has asked schools to adhere to the following:

It is the Government's plan that all pupils, in all year groups, will return to school full-time from the beginning of the autumn term.

The link to Government guidance is as follows:

<https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-schools>

The government guidance says the following:

Schools must comply with health and safety law, which requires them to assess risks and put in place proportionate control measures. Schools should thoroughly review their health and safety risk assessments and draw up plans for the autumn term that address the risks identified using the system of controls set out below. These are an adapted form of the system of protective measures that will be familiar from the summer term. Essential measures include:

- a requirement that people who are ill stay at home
- robust hand and respiratory hygiene
- enhanced cleaning arrangements
- active engagement with NHS Test and Trace
- formal consideration of how to reduce contacts and maximise distancing between those in school wherever possible and minimise the potential for contamination so far as is reasonably practicable

How contacts are reduced will depend on the school's circumstances and will (as much as possible) include:

- grouping children together
- avoiding contact between groups
- arranging classrooms with forward-facing desks
- staff maintaining distance from pupils and other staff as much as possible

As an employer we must protect people from harm. This includes taking reasonable steps to protect staff, pupils and others from coronavirus (COVID-19) within the education setting.

The school has remained open to some pupils since 20th March, and welcomed more pupils back from 15th June. We have therefore already assessed the risks and implemented proportionate control measures to limit the transmission of coronavirus (COVID-19) for a limited number of pupils.

As part of planning for full return in the autumn term, it is a legal requirement that we should revisit and update our risk assessments (building on the learning to date and the practices they have already developed), consider the additional risks and control measures to enable a return to full capacity in the autumn term. We are also reviewing and updating our wider risk assessments and consider the need for relevant revised controls in respect of our conventional risk profile considering the implications of coronavirus (COVID-19). We will implement sensible and proportionate control measures which follow the health and safety hierarchy of control to reduce the risk to the lowest reasonably practicable level.

We have active arrangements in place to monitor that the controls are:

- effective
- working as planned
- updated appropriately considering any issues identified and changes in public health advice.

The school RA for full opening to all students and staff sets out the known hazards and important controls that have been advised either by the Government/DfE, the World Health Organisation (WHO), Public Health England (PHE), NHS (safe practice) or good practice.

Personal Protective Equipment (PPE) including face coverings and face masks:

The government is not recommending universal use of face coverings in all schools. Schools that teach children in years 7 and above and which are not under specific local restriction measures will have the discretion to require face coverings for pupils, staff and visitors in areas outside the classroom where social distancing cannot easily be maintained, such as corridors and communal areas and it has been deemed appropriate in those circumstances.

In particular, schools that teach years 7 and above may decide to recommend the wearing of face coverings for pupils, staff or visitors in communal areas outside the classroom where the layout of the schools makes it difficult to maintain social distancing when staff and pupils are moving around the premises, for example, corridors.

Based on current evidence and the measures that schools are already putting in place, such as the system of controls and consistent bubbles, face coverings will not be necessary in the classroom even where social distancing is not possible. Face coverings would have a negative impact on teaching and their use in the classroom should be avoided.

Where local restrictions apply

In areas where local lockdowns or restrictions are in place, face coverings should be worn by adults and pupils (in years 7 and above) in areas outside classrooms when moving around communal areas where social distancing is difficult to maintain such as corridors.

In the event of new local restrictions being imposed, schools will need to communicate quickly and clearly to staff, parents, pupils that the new arrangements require the use of face coverings in certain circumstances.

Other PPE is only needed in a very small number of cases including:

- Children, young people and students whose care routinely already involves the use of PPE due to their **intimate care needs** should continue to receive their care in the same way.
- If a child, young person or other learner becomes **unwell with symptoms of coronavirus** while in their setting and needs direct personal care until they can return home. A facemask should be worn by the supervising adult if a distance of 2 metres cannot be maintained. If contact with the child or young person is necessary, then gloves, an apron and a facemask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example, from coughing, spitting, or vomiting, then eye protection should also be worn.
- PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as a very young child or a child with complex needs). More information on PPE use can be found here <https://www.gov.uk/government/publications/safe-working-in-education-childcare-and-childrens-social-care/safe-working-in-education-childcare-and-childrens-social-care-settings-including-the-use-of-personal-protective-equipment-ppe>

The overarching principle to apply is **reducing the number of contacts between children and staff**. This can be achieved through **keeping groups separate (in 'bubbles')** and through **maintaining a distance between individuals**. These are not alternative options and both measures will help, but the balance between them will change depending on:

- Children's ability to distance
- The layout of the school
- The feasibility of keeping distinct groups separate while offering a broad curriculum (especially at secondary).

It is likely that for younger children the emphasis will be on separating groups, and for older children it will be on distancing. For children old enough, they should also be supported to maintain distance and not touch staff where possible.

It remains important to reduce contact between people as much as possible, and we can achieve that and reduce transmission risk by ensuring children, young people and staff where possible, **only mix in a small, consistent group** and that small **group stays away from other people** and groups.

Consistent groups reduce the risk of transmission by limiting the number of pupils and staff in contact with each other to only those within the group. Maintaining distinct groups or 'bubbles' that do not mix makes it quicker and easier in the event of a positive case to identify those who may need to self-isolate, and keep that number as small as possible. Siblings may be in different groups.

All teachers and other staff can operate across different classes and year groups in order to facilitate the delivery of the school timetable. Where staff need to move between classes and year groups, they should try and keep their distance from pupils and other staff as much as they can, ideally 2 metres from other adults. Supply Teachers, peripatetic teachers and temporary staff may move between schools if required.

Government guidance advises the following:

Schools should assess their circumstances and if class-sized groups are not compatible with offering a full range of subjects or managing the practical logistics within and around the school, they can look to implement year group sized 'bubbles'. Whatever the size of the groups, they should be kept apart from other groups where possible and older children should be encouraged to keep their distance within groups.

Schools with the capability to do it should take steps to limit interaction, sharing of rooms and social spaces between groups as much as possible. When using larger groups, the other measures from the system of controls become even more important, to minimise transmission risks and to minimise the numbers of pupils and staff who may need to self-isolate.

Both approaches of separating groups and maintaining distance are not 'all-or-nothing' options, and will still bring benefits even if implemented partially.

Measures not in the classroom:

Groups should be kept apart and movement around the school site kept to a minimum. Schools should avoid busy corridors, entrances and exits. Breaks and lunchtimes should be staggered. The use of staffrooms should be minimised. Staff spaces that are shared must be planned to enable social distancing and suitable sanitising.

Measures for arriving at and leaving school:

Where travel to school patterns allow staggered start and finish times in your school, you should consider this to keep groups apart. Schools must communicate this effectively to parents and students to prevent congestion or large gatherings at the start and finish of each day.

Schools should implement a process for removing face coverings when pupils or staff who use them arrive at school. Pupils should be taught how to do this correctly (not touching the front of their face), washing hands immediately on arrival, disposing of temporary coverings appropriately and placing reusable ones in plastic bags to take home.

Equipment in schools:

For individual and very frequently used equipment such as pencils and pens, it is recommended that staff and pupils have their own items they are NOT shared.

Classroom based resources can be shared within a bubble. These must be cleaned regularly as should surfaces. Resources shared between bubbles, such as sports, art and science equipment should be cleaned frequently and meticulously between use or rotated to allow them to be left unused and out of reach for a period of 48 hours (72 hours for plastics).

Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided, and the school should ensure such resources are cleaned when they are returned to school.

Outdoor equipment should be more frequently cleaned. This also applies to resources inside and outside by wraparound care providers. It is recommended that students limit the amount of equipment they bring to school to only essentials. Shared resources can be taken home but avoided where unnecessary. All such resources will need to be cleaned before used by others.

Engage with the NHS Test and Trace process:

Schools must ensure they understand the NHS Test and Trace process and how to contact their local Public Health England protection team. The guidance should be consulted to ensure this is all fully understood and followed by staff members and parents/carers.

Manage confirmed cases of COVID-19:

Schools must take swift action when they become aware that someone who has attended has tested positive for COVID-19. They should contact the local health protection team. This includes, implementing their advice, specific procedures and containing any outbreak as directed.

Transport arrangements:

Transport to and from school should be assessed if provided by the school or if managed by the school team. The school needs to consider:

- How can this be managed safely or adapted to for in line with current social distancing requirements?
- Do school start times need to be adjusted to accommodate staff and students getting to school safely?
- When using public transport, rules that apply to the general population will apply.

Dedicated school transport – no public use

Normal public transport social distancing rules do NOT apply. The approach to dedicated transport should align as far as possible with the principles underpinning the system of controls set out in the overall guidance for schools. Schools should consider:

- How pupils are grouped together on transport, where possible this should reflect the bubbles that are adopted within school
- Use of hand sanitiser upon boarding and or disembarking
- Additional cleaning of vehicles
- Organised queuing and boarding where possible
- Distancing within the vehicle wherever possible
- The use of face coverings for children over the age of 11, where appropriate, for example, if they are likely to come into very close contact with people outside of their group.

Premises Management

It is important that, prior to re-opening for the autumn term, all the usual pre-term building checks are undertaken to make the school safe.

Risk	Control measures	In place? (Yes/No)	Comments/ Outstanding action
<p>Spread/contraction of COVID-19 due to interaction with a person who has symptoms of the disease, a person who may be asymptomatic or lack of information on how infection risks are controlled in the school.</p>	<ul style="list-style-type: none"> • Government guidance is being reviewed on a daily basis to ensure the latest available information is put into practice. Guidance for full opening: schools - GOV.UK • Members of staff, pupils, and visitors to the school are reminded of the symptoms of coronavirus (COVID-19) at the point of entry to the site by posters displayed at site entrances and/or site rules displayed on visitor checking in systems and by regular communication with parents / carers via newsletters/email bulletins/social media/website updates. • The school has informed parents, students, carers, employees and visitors not to enter the school if they are displaying any symptoms of coronavirus (following the COVID-19 guidance for households with possible coronavirus infection); • Parents receive guidance on school times for their child and protocols set out for attending the school i.e. should remain 2m apart from others • COVID-19 guidelines are published on the school's website • Parents/Carers are informed of the general arrangements being made and what is expected of them in terms of dropping off and collecting children and any other local important procedures, emphasising their role in terms of the local and national approach would also be appropriate as that potentially impacts on school life and the whole pandemic control measures • Whenever possible, meetings will take place remotely via videoconferencing, phone, email or post. • People deemed vulnerable take particular care to minimise contact with others and are advised to follow Guidance on shielding and protecting people who are clinically extremely vulnerable from COVID-19 • The school will try as far as practically possible to be flexible and accommodate additional measures for vulnerable people where appropriate 	<p>Y</p> <p>Y</p> <p>Y</p> <p>Y</p> <p>Y</p> <p>Y</p> <p>Y</p> <p>Y</p>
