Level 2 Certificate

Cambridge Nationals

Examination Board:

OCR

Assessment:

Internal assessment 50%

External examination 50%

What Will You Learn?

The Award gives Learners the opportunity to develop sector-specific knowledge and skills in a practical learning environment and are transferable skills required by employers. There are two areas of equal importance:

- **Unit R012 Understanding tools, techniques, methods and processes for technological solutions.** Students will sit an exam to assess their knowledge and understanding of different technologies (hardware and software), and tools and techniques used to select, store, manipulate and present data and information.
- **Unit R013 Developing technical solutions.** Students will be given a project to develop a technological solution that processes data and communicates information. The assessment of the project focuses on how effectively learners use their skills when developing a technological solution.

Who is This Course For?

The OCR Cambridge Nationals in Information Technology is for Learners who wish to acquire technical skills through vocational contexts as part of their Key Stage 4 learning. The qualification recognises the value of learning skills, knowledge and vocational attributes to complement GCSEs.

What Happens When You Finish? (Career Pathway)

Learners who achieve a Level 2 in this subject might consider progressing to study a vocational qualification at Level 3 (such as a Cambridge Technical in IT or Digital Media). It will also equip Learners with the necessary skills for any employment in the ICT sector.
