

Lighting Project

Design the lighting for an imaginary show called 'The Argument'. Make a clear and detailed plan showing how the lights will change during the dance.

In this plan, show how the lights will change throughout the sections of the dance, including:

- Fade in or fade out? Why?
- Cut to black out? Why?
- Different colours (plain lighting is called 'white' light). Other colours could be red, blue, green. Why?
- Special effects such as flashing, spot lights, gobos (sends a pattern onto the stage).

Be imaginative! Your plan can look how you want it to.

Section of dance	
Lighting colour, effects	
Effect I hope to achieve	

You **SHOULD** do the above, taking time to be imaginative and thoughtful about **WHY** you have made decisions.

You **COULD** do the above, imaginatively and in detail, explaining what you have learnt that you didn't already know. You might also refer to other shows where professionals have used lighting in an interesting way.
