Animals

- Darwin argues that the creatures with characteristics most suited to the environment are more likely to survive, reproduce and pass on their genes of their offspring.
- They will adapt to survive in their natural habitats and therefore will create new species,
- The fittest survive and some have to go extinct.

Christian attitudes to evolution

- Christians believe that they do not need to worry about what the theory implies about God's role in creation.
- Some believe Darwin is wrong as life started the way the Bible states,
