

THE YEAR 9

2024 - 25

CURRICULUM@ ALDERBROOK

'Look up at the stars and not down at your feet. Try to make sense of what you see, and wonder about what makes the universe exist. Be curious.'

Stephen Hawking

AMBITION | BRAVERY | KINDNESS

Ambition for our Year 9 Curriculum:

Year 9 is a crucial transitionary year which provides a bridge onto GCSE or Technical Award courses. The knowledge and skills developed in Year 7 and 8, are further developed in Year 9, whilst students are beginning to explore their chosen subjects in more depth. The breadth and balance of the curriculum is maintained as students continue to study Maths, English, Science, PE, RE and PSHE, then a further **four** option subjects.

Whilst Year 9 students will be given aspirational target grades for each subject, there will be a continuing focus on a student's approach to learning, including their effort, resilience, contributions in class, independence and response to feedback. A combination of these qualities is vital not only for academic success, but also for future employment. Feedback will be provided regularly for students both in lessons and on school reports, with frequent opportunities for students to revisit content, make corrections and address misconceptions. As in Year 7 and 8, Year 9s will sit Summer Term Assessments which will test their learning from the start of the year. This process of revisiting learning content is important as it allows students to practise strategies for revising and develop long term memory. We know that the more times students visit learning content in different ways – the more likely they are to remember.

Students continue to be supported through our Careers Programme, including considering the fast-moving economic environment and ever-changing job market. They will have opportunities to reflect upon their personal strengths, preferences and broader employability skills.

The **Personal, Social, Health, Citizenship and Economic Education** programme supports students of this age to become increasingly aware of physical and emotional changes, how to keeping themselves well in all senses and how to stay safe in society including online. Students are guided to debate and evaluate scenarios that will help them to appreciate and personalise these important messages. **Literacy and numeracy** remain vital skills in Year 9. They will participate in our reading initiative 'Uniquely Portable Magic' during form time and students should be encouraged to read a variety of texts at home. All teachers will support students to develop their literacy, particularly through reading in lessons and learning key vocabulary. Understanding key terminology now, will support them to make progress next year. Students with a broader vocabulary will have an advantage as they progress through their school life.

Bravery:

Year 9 is a key age where personal and social confidence needs to be a focus. Students are strongly encouraged to continue or begin to pursue extra- curricular activities. The programme of assemblies, PSHE lessons, and Life Ready Days in Year 9 encourage this growth, whilst supporting students to make the right decisions and stay safe.

Kindness:

In our **Pastoral System**, Year 9s continue to have a form tutor and a Year 9 tutor group they will meet each day. This will be the key member of staff who will support your child with any day to day pastoral issues they may have. The Pastoral Manager will provide further support where needed, and the Head of Year will oversee the overall progress of students. **The Head of Year 9 is Mr R Graham, and the Pastoral Manager for Year 9 is Mr M Stockman.** These members of staff know this year group very well, having supported them through Year 7 and 8.

Computer Science

'The greatest enemy of knowledge is not ignorance, it is the illusion of knowledge.' Stephen Hawking

Computer Science in Year 9 encourages students to understand the fundamentals of Computer Science by looking into both hardware of a computer and programming. Students will develop a Computational Thinking approach to solving problems and design working solutions through algorithms and code. Students are encouraged to apply these skills not just in the classroom but also to everyday problems, as this can be a valuable skill in the workplace. By not just looking at the products of a computer but looking at Ethical, Legal, Cultural, Environmental and Privacy issues surrounding computer science. Students will have an awareness of how Computer Science is influencing everyday life

Dance

'No one occupies the totality of his body as great dancers do'.

Amélie Nothomb

In year 8, students learnt about the use of performance and choreography skills and began to develop an ability to appreciate their own work and the work of others. Year 9 dance builds on the previous year's knowledge of those components however; students become 'dancers in training', improving their physical, technical, expressive and mental skills. Dancers engage in social learning by observing and absorbing what the choreographic process could possibly look like. Dance appreciation is developed further as dancers analyse their work and professional work. By year 10, dancers should be ready to embark on further rigour of performance training to support their ability to perform the mandatory exam solos.

Dance

"No one occupies the totality of his body as great dancers do'. Amélie Nothomb

In year 8, students learnt about street dance and how to perform in a stylistically accurate way. They challenged their bodies to learn physical theatre skills and created a duet on the topic confrontation. In year 9, dance appreciation is developed further as students engage with analysis of their own work, learning how their physical skills can be trained. In choreography, students undergo the choreographic process to produce a full piece of dance based on a theme. By year 10, dancers should be ready to embark on further rigour of performance training to support their ability to perform challenging dance work.

	Autumn Term 1	Autumn Term 2	Spring Term 1	Spring Term 2	Summer Term 1	Summer Term 2		
Skills and knowledge	Participate in bootcamp training which aims to develop strength, stamina, balance, control, isolation, coordination, flexibility, extension, mobility, posture and alignment. Learn and perform a set phrase as a duet in exam performance conditions. Look online at the AQA GCSE Dance specification (performance) and ask a ABK Dance Family member for training advice.	Synergise each dancer's physical skill to create a quartet which demonstrates the application of strength, stamina, balance, control, isolation, coordination, flexibility, extension, mobility, posture and alignment.	Know how to create movement material using dreams and nightmares as a stimulus. Students will learn how to structure choreography in order to produce a full piece.	Know how to rehearse and refine a full piece of choreography.	Develop performance skills in different dance styles taking inspiration from a range of professional repertoire.	Increase knowledge of how styles can fuse to create unique performance work. Study Itzik Galili's A Linha Curva and create a practical response to the stimulus, approach and intention of the work.		
Key Assessments and assessment criteria	Final lesson: Performance: Perform a physical theatre in a duet.	Peer and self- assessment throughout the process. Design & Technology

"Many things difficult to design prove easy to performance' Samuel Johnson

Design and Technology in Year 9 encourages students to understand the fundamentals of Design and Making by covering a range of projects using different material areas and the use of CADCAM as well as an introduction to software programmes. Students will develop projects based around given briefs or target markets approach to solve problems and design working solutions.

	Autumn Term 1	Autumn Term 2	Spring Term 1	Spring Term 2	Summer Term 1	Summer Term 2

How you can help your child at home	to use Quizlet which w work via Classcharts. G French website which	Every pupil work booklet includes an overview of the topic and key grammar points that you and your child can refer to for support. We continue to use Quizlet which was introduced in Year 7. Regular Quizlet study sets will be provided by the French Department in line with the scheme of work via Classcharts. GCSEpod www.gcsepod.com (pupils need to register) is the main revision website we recommend as well as our very own French website which draws together all the main websites and resources for independent study. All students need a pocket size bilingual dictionary. CGP Revision Guides and Revision Question Cards are recommended purchases.					

Geography

'Geography is the subject which holds the key to our future' Michael Palin

Students that choose to study Geography in Year 9, will build on their knowledge from topics in year 7 and 8 such as Physical UK and Our Future Resources. They will also develop their geographical skills and GCSE exam technique which will prepare them for studying Geography in Year 10

The skills that students will learn whilst studying Geography will allow them to have a greater awareness of the world around them and how they can have a positive impact upon it.

	Autumn Term 1	Autumn Term 2	Spring Term 1	Spring Term 2	Summer Term 1	Summer Term 2		
Component Knowledge	Earth Hazards Explore what causes tectonic hazards of volcanoes, earthquakes and subsequent Tsunamis. Investigate a case study of Montserrat's volcanic eruption in 1997.	Earth Hazards continued We will comare the cause, effects and responses to the earthquakes that occurred in Nepal and L'Aquila in Italy. DME – We will explore real life decision making exercise of whether a cruise ship port should be built in Grand Cayman	Climate Change causes Using the film 'The Lorax', we will explore the causes of climate change on our planet.	Climate Change solutions We will explore the mitigation and adaptations that form the current solutions for climate change. We will design a future sustainable city and consider what students can do to help tackle climate change Fieldwork – To investigate the sustainability of our school ABK	Global Issues and solutions To explore Africa's past of colonialism, and the issue that has left the continent with some big issues, starting with Piracy. The film 'Captain Phillips' will be used to explore this issue.	Global issues continued Overfishing Plastics in our oceans. COVID Ebola

Assessment s and End Points	Mid point assessment on Earth hazards	Assessment point 1 Earth hazards		Designing a sustainable city – learning grade	Assessment point 2			
Literacy & Numeracy	Numeracy Literacy – Defining and Understanding the meanings of key terms such as ecosystems, sustainability, biomes, climate, management, resources, processes, features to apply them Numeracy – being able to read and locate places and biomes on an atlas using latitude and longitude, and on an OS map using 6 figure grid references. Being able to read the story behind the data on graphs, including climate graphs. To create a graph from data.							
Wider skills and enrichment	Students will place themselves in the wider world and their impact upon today's global ecosystems, resources and natural systems. They will study how people adapt to living in extreme environments compared to how they live. They will connect with the role they play as citizens of this planet and the role they play in solving its issues. They will learn how to create a field sketch by visiting the woodland in our school grounds and start to look at ecosystems around where they live and go to school. Media

'He who controls the media controls the minds of the public' Noam Chomsky

In Year 9, students are introduced to the 5 main areas of the GCSE Media framework: Media Language, Representation, Media Audiences, Industries and Contexts. Students have the opportunity to engage with a wide range of media forms, in newspapers, magazines, music videos, video games, film and TV

	Autumn Term 1	Autumn Term 2	Spring Term 1	Spring Term 2	Summer Term 1	Summer Term 2		
Component Knowledge	INTRODUCTION · Introduction to media language and the codes and conventions of print adverts, newspapers and magazines. · Introduction to key media terminology. · Developing students' ability to deconstruct media texts: unpick choices producers have made and explain connotations of media language in detail	SITCOM · An introduction to key codes and terminology associated with audio-visual texts. · Practising moving image extract analysis. · Understanding codes and conventions of sitcom. · Gaining an appreciation for what is meant by genre, and being able to comment on how far a text is typical of its genre. · Analysing and comparing a range of sitcom extracts with a focus on the connotations of media language.	MUSIC VIDEO · Understanding the key codes and conventions associated with music video. · Deconstructing representations of gender and ethnicity in music videos via an analysis of media language · Considering music videos past and present to understand how the medium has evolved and how music. videos are a product of the time times in which they were produced.	BOND · Analysing moving images, film posters and DVDs in relation to media language. · Understanding they key codes and conventions involved in each form, plus the associated terminology. · Deconstructing representations of gender and ethnicity within Bond film posters – both historic and current. · Understanding how media texts reflect the historical, social and political context in which they are produced	POKEMON GO- Understanding how gaming companies target audiences through marketing and promotion, how creative industries generate revenue through convergence and crossplatform marketing with other companies.	Mock NEA (Coursework) · Pupils will study how the magazine industry entice specific audiences through representation of products and people. · Pupils will then create and evaluate their own draft magazine front cover and accompanying pages responding to a brief given. · Pupils will be introduced to key software packages involved in coursework production, including Photoshop and Canva		
Assessments and End Points	Component 1- Media Language question Q1 a,b,c (5 marks each) based on one of the media forms studied so far and will assess their ability to analyse media language by explaining connotations and applying media terminology.	Component 2 – Media Language questions Q1a- 8 marks and 1b (12 marks based on an extract from a text studied and will assess their ability to analyse connotations of media language, as well as identify conventions of the sitcom genre.	Component 2 – Representation question (20 marks) Students will be asked to compare one of the music videos we have studied with a further music video from a different era. The question will be based on the representation of gender or ethnicity	Component 1 – Representation and Context questions Q2 a (5 marks) and b (25 marks) Comparison of one of two Bond film posters, past and present. Comparing differing contexts and representations.	Component 1- Media Industries and Audiences stepped questions (18 marks)	Component 3 – NEA 60 marks in total. 10 marks for the statement of aims, 20 marks for meeting the brief and 30 marks for their control of media language and construction of representations. The students' finished products will be marked against the previous year's brief.		
Literacy & Numeracy	Literacy: • The correct spelling ar inferences from text and image. their NEA products.	e ability to make intelligent nt and ratio, e.g. when designing						
Wider skills and enrichment	standards cultivated by the med of a more 'critical' eye when it co	An understanding of how people of colour amongst other minority groups are often underrepresented or misrepresented by the media. · An appreciation for the unfair beauty tandards cultivated by the media, and the impact that this can have on the mental health of those consuming it. · A greater awareness of the dangers of social media. · Development of a more 'critical' eye when it comes to engaging with a variety of news sources; an understanding of what "fake news" is, the idea that some news sources are more reliable than others, as well as the idea that media institutions have their own particular agenda, and will mediate the information they transmit to that end.						
How you can help your child at home			and products from the past and preserent YouTube tutorials to help your child					

Music

'Music awakens the soul' Lailah Gifty Akita

Students are expected to develop their instrumental skills as well as their musicianship. Improving these skills will help with the Music Theory unit as well as composition. Determination to succeed will be a key skill needed for this year.
